

WellIntel is Supporting Research by Transforming Groundwater Data Crowdsourcing

Dr. Joe Fillingham, Science Lead
Marian Singer, CEO
Nick Hayes, CTO

IMAGINE |  | H₂O
RUNNER-UP

Groundwater ...

50% of drinking water

42% of irrigation water

60% of US pop. lives in a stressed area

12M wells = property + production value for

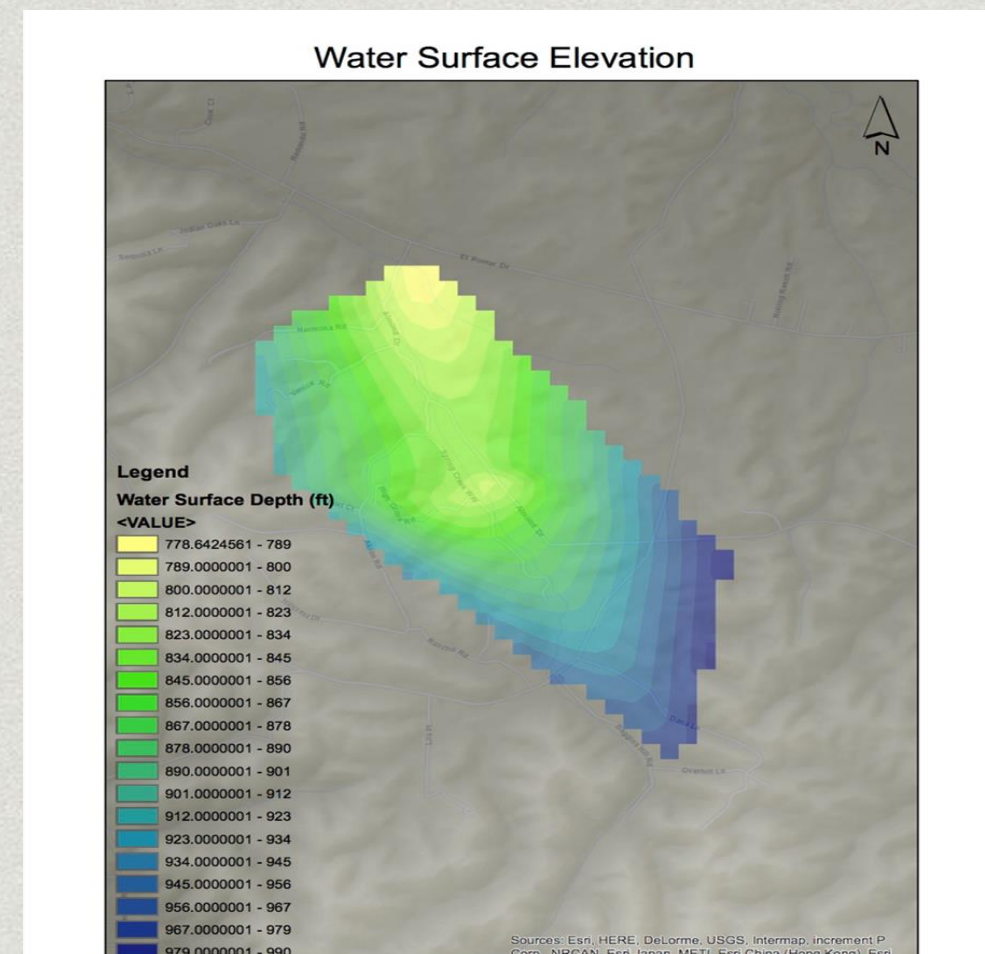

44M homeowners and farmers

Vital, but stressed & unseen...

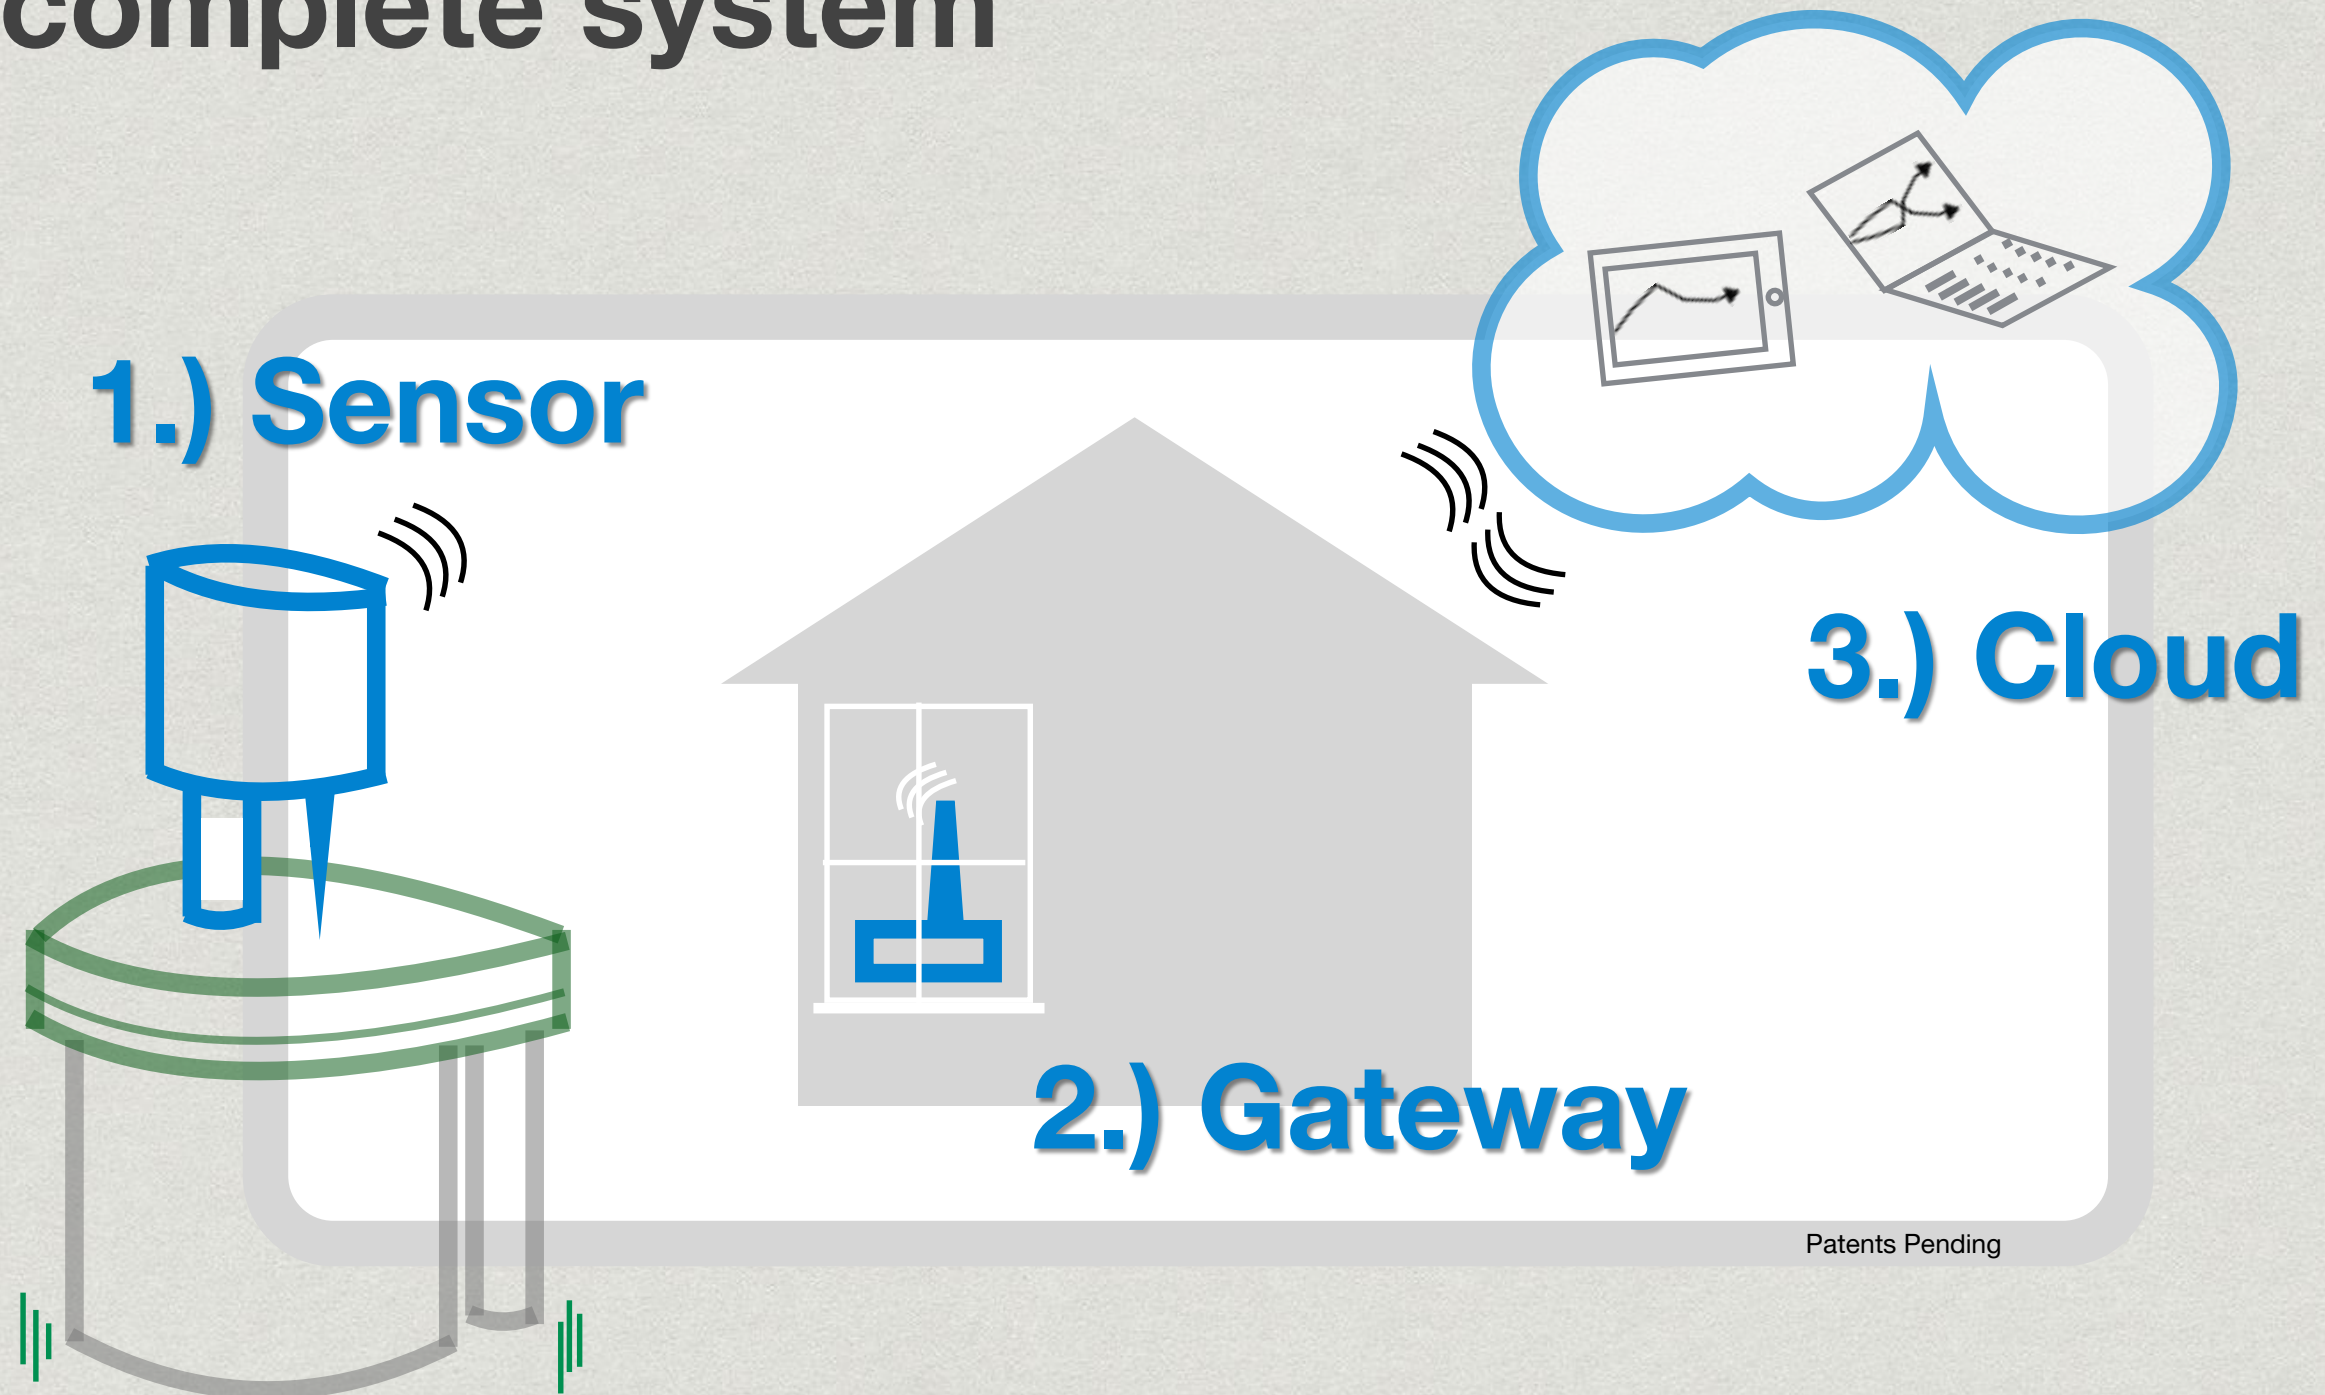

Our goal is to democratize groundwater information...

Vast yet **Local**
Useful and **Understandable**
Environmental and **Entrepreneurial**

... **with** a disruptive, simple, and complete system

* Provisional and pending patents on device, installations method data algorithms, and new sensors not shown.

WELLNTEL

PRODUCT

WellIntel is...

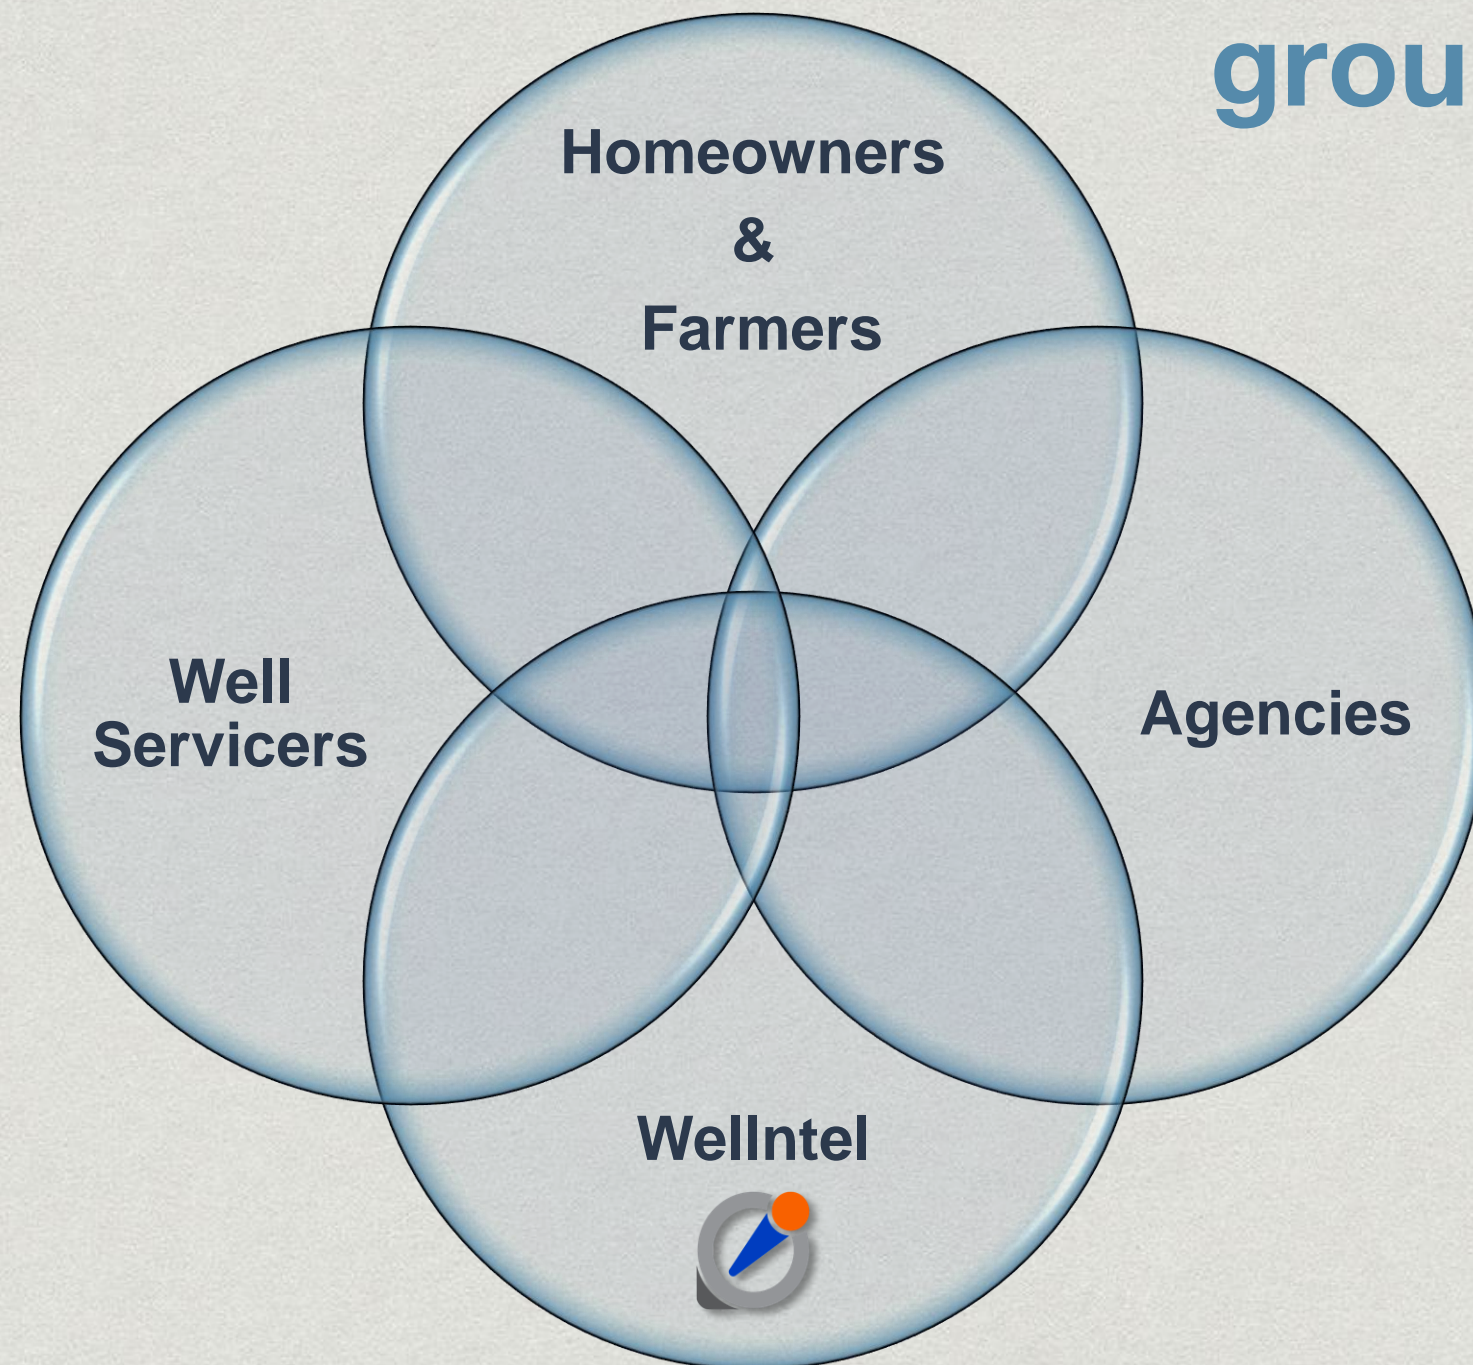

Useful because it's **Easy**
Scalable because it's **Simple**
Powerful because it's **Adaptive**
Impactful because it's **Democratic...**

WELLNTEL

PRODUCT

...and recommended by well professionals and
groundwater experts

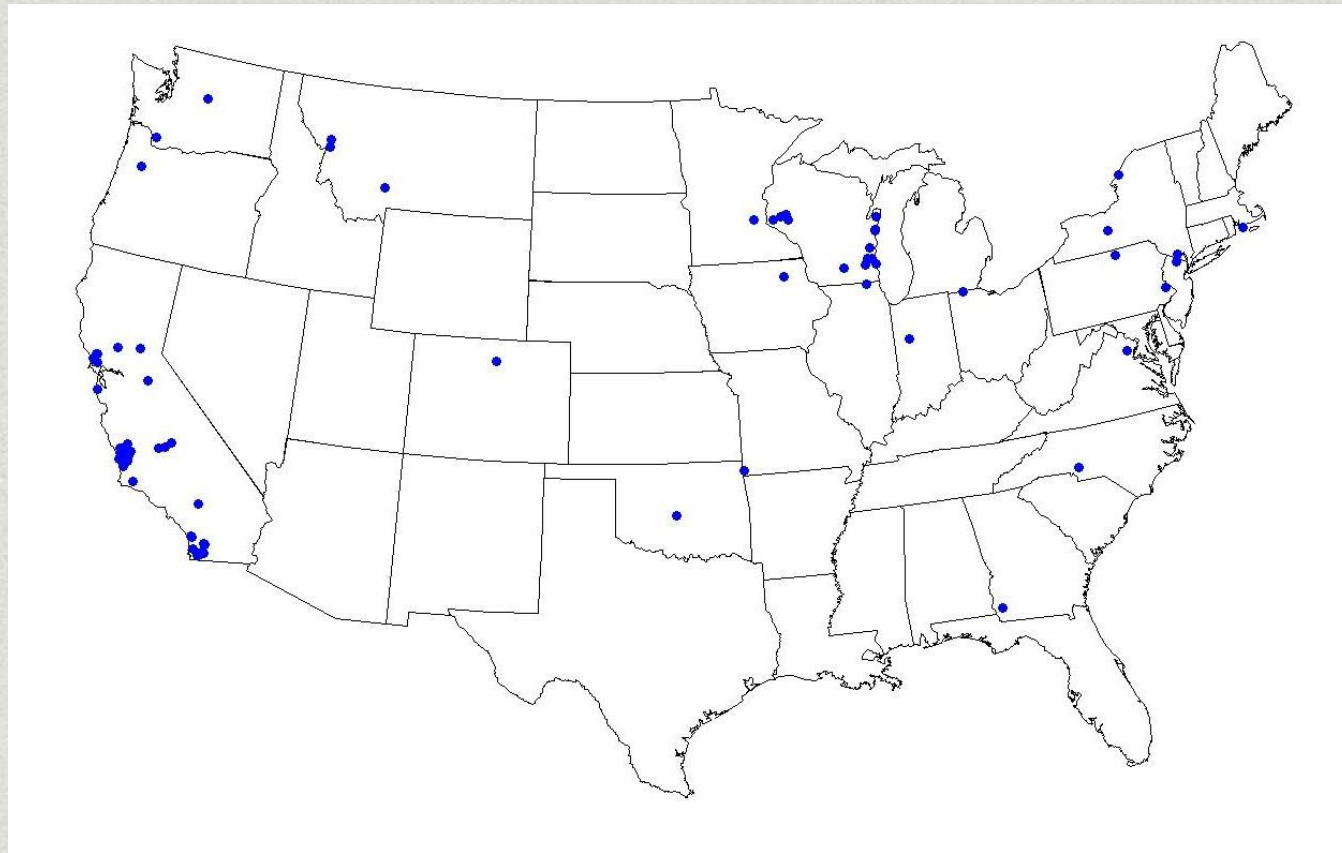

WELLNTEL

MODEL

Expanding spatial and temporal coverage

Engaging stakeholders

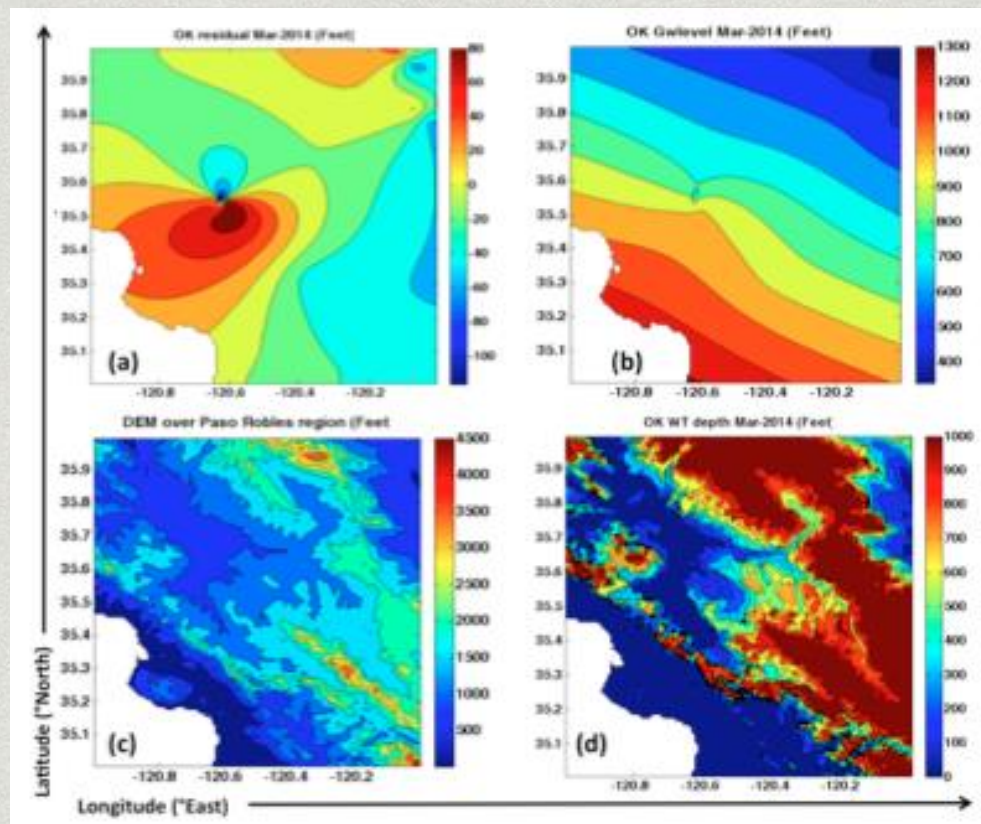

Informing sustainable actions

WELLNTEL

IMPACT

Along the way we have started to change the conversation

Identifying problems, improving
efficiency, informing
management and policy

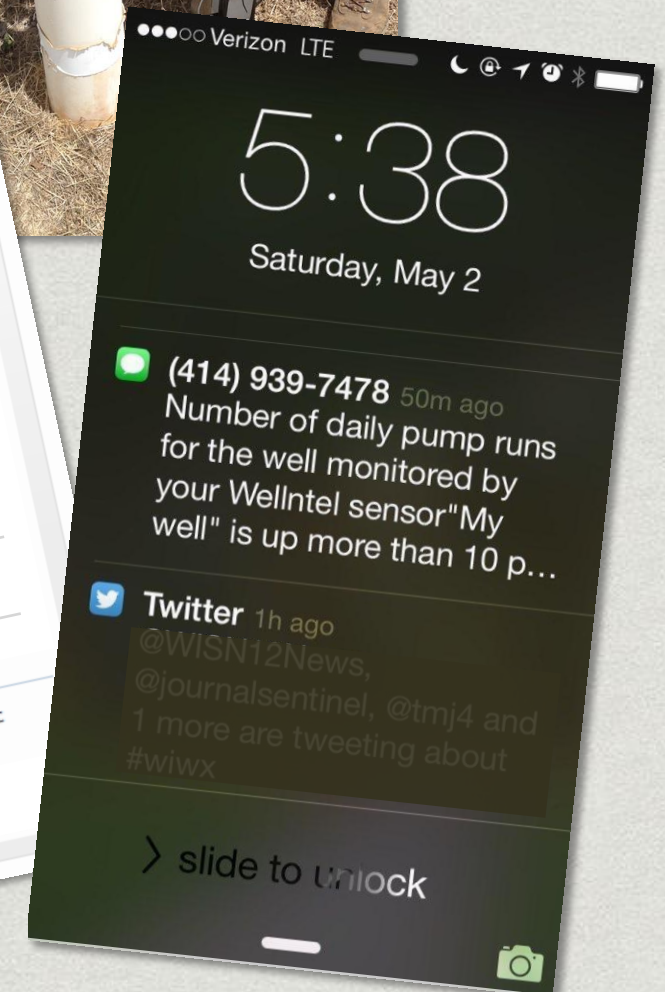

Berkeley report confirms
dense data supports
modeling efforts, leads to
new understanding

Tackling Crowdsourcing Challenges

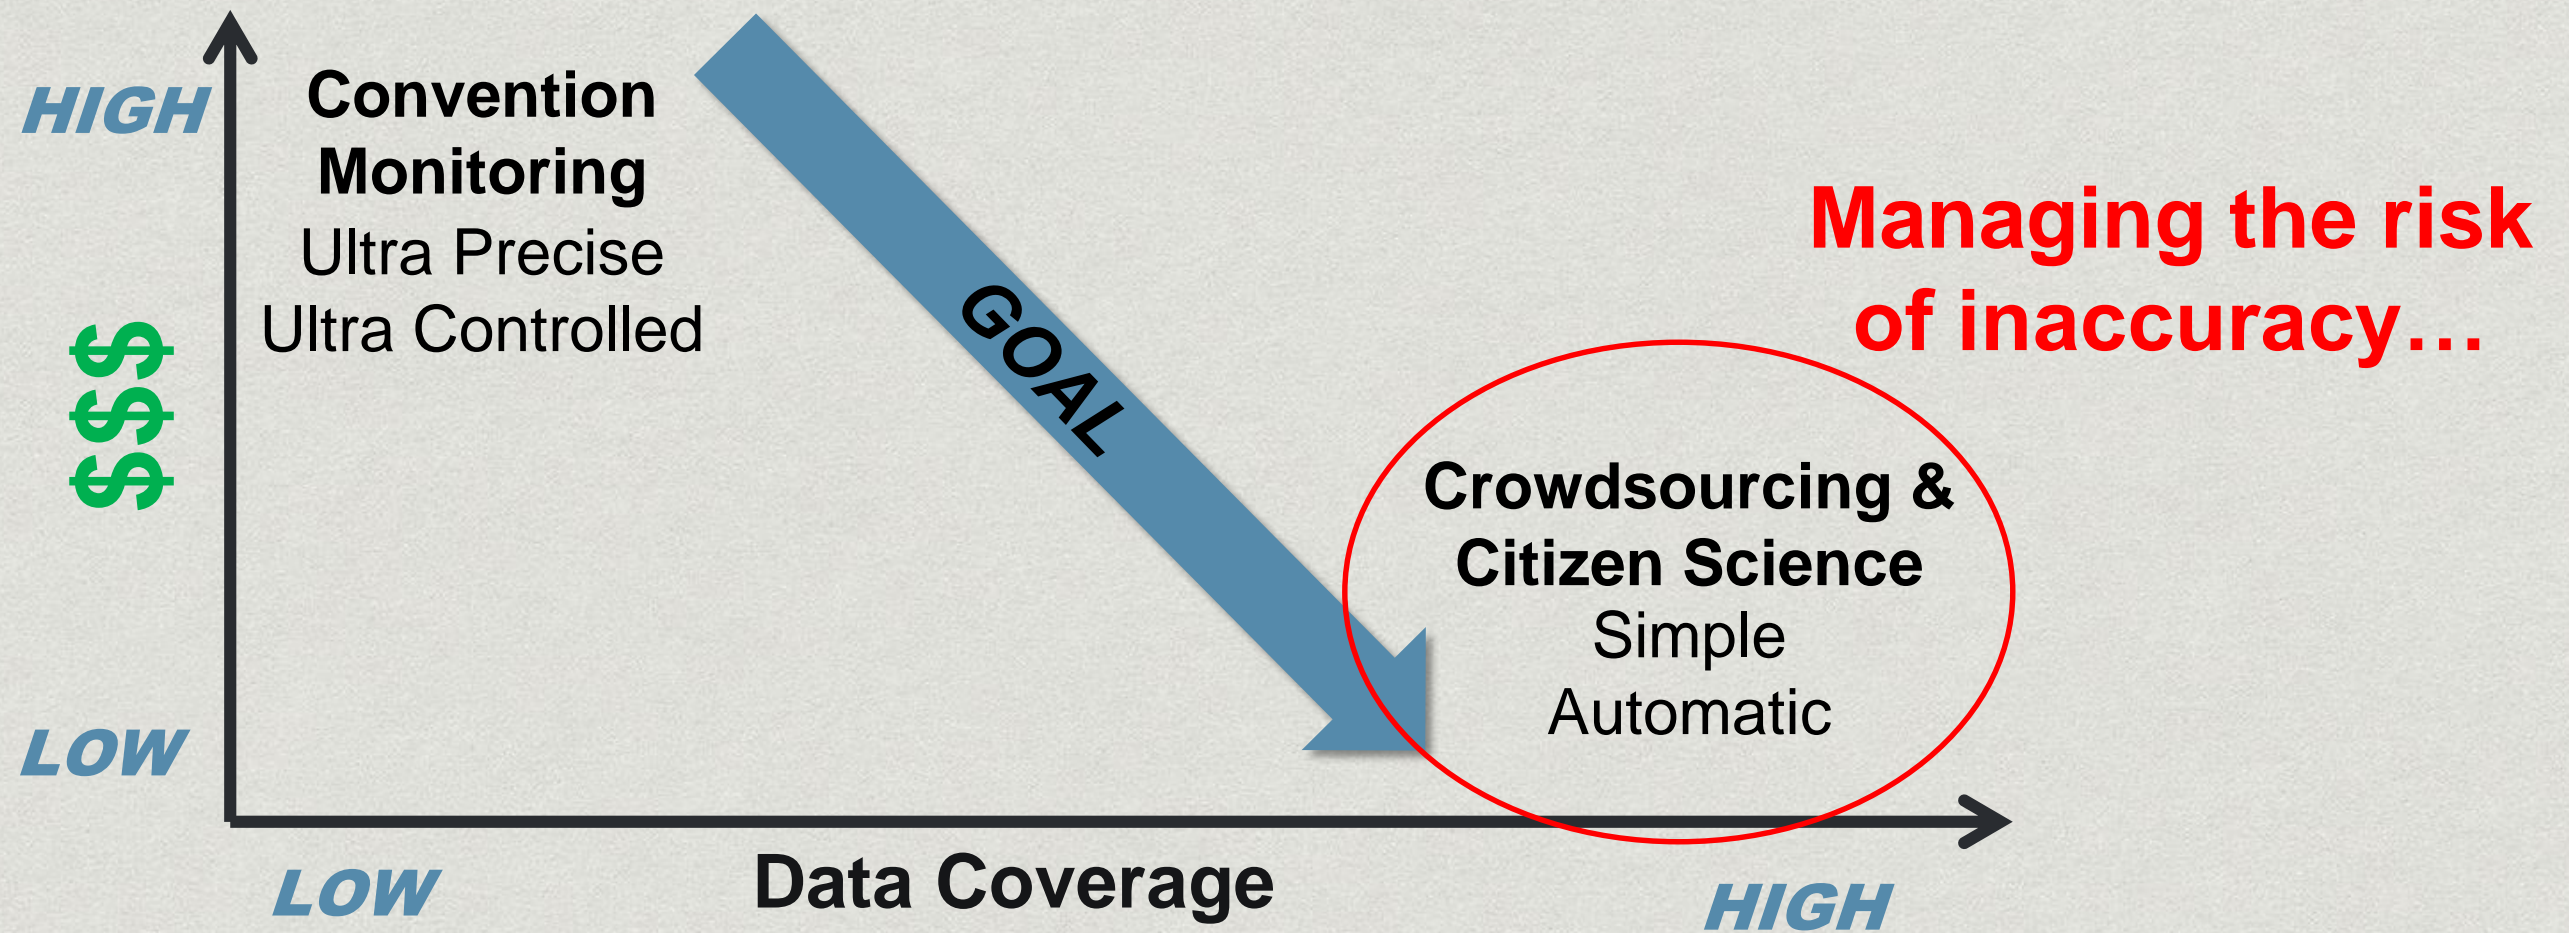

- ***Purpose Built***
- ***Automatic***
- ***Adaptable***
- ***Secure***
- ***Open & Sharable***

Accessible
Affordable

Evaluating Risk in scientific monitoring...

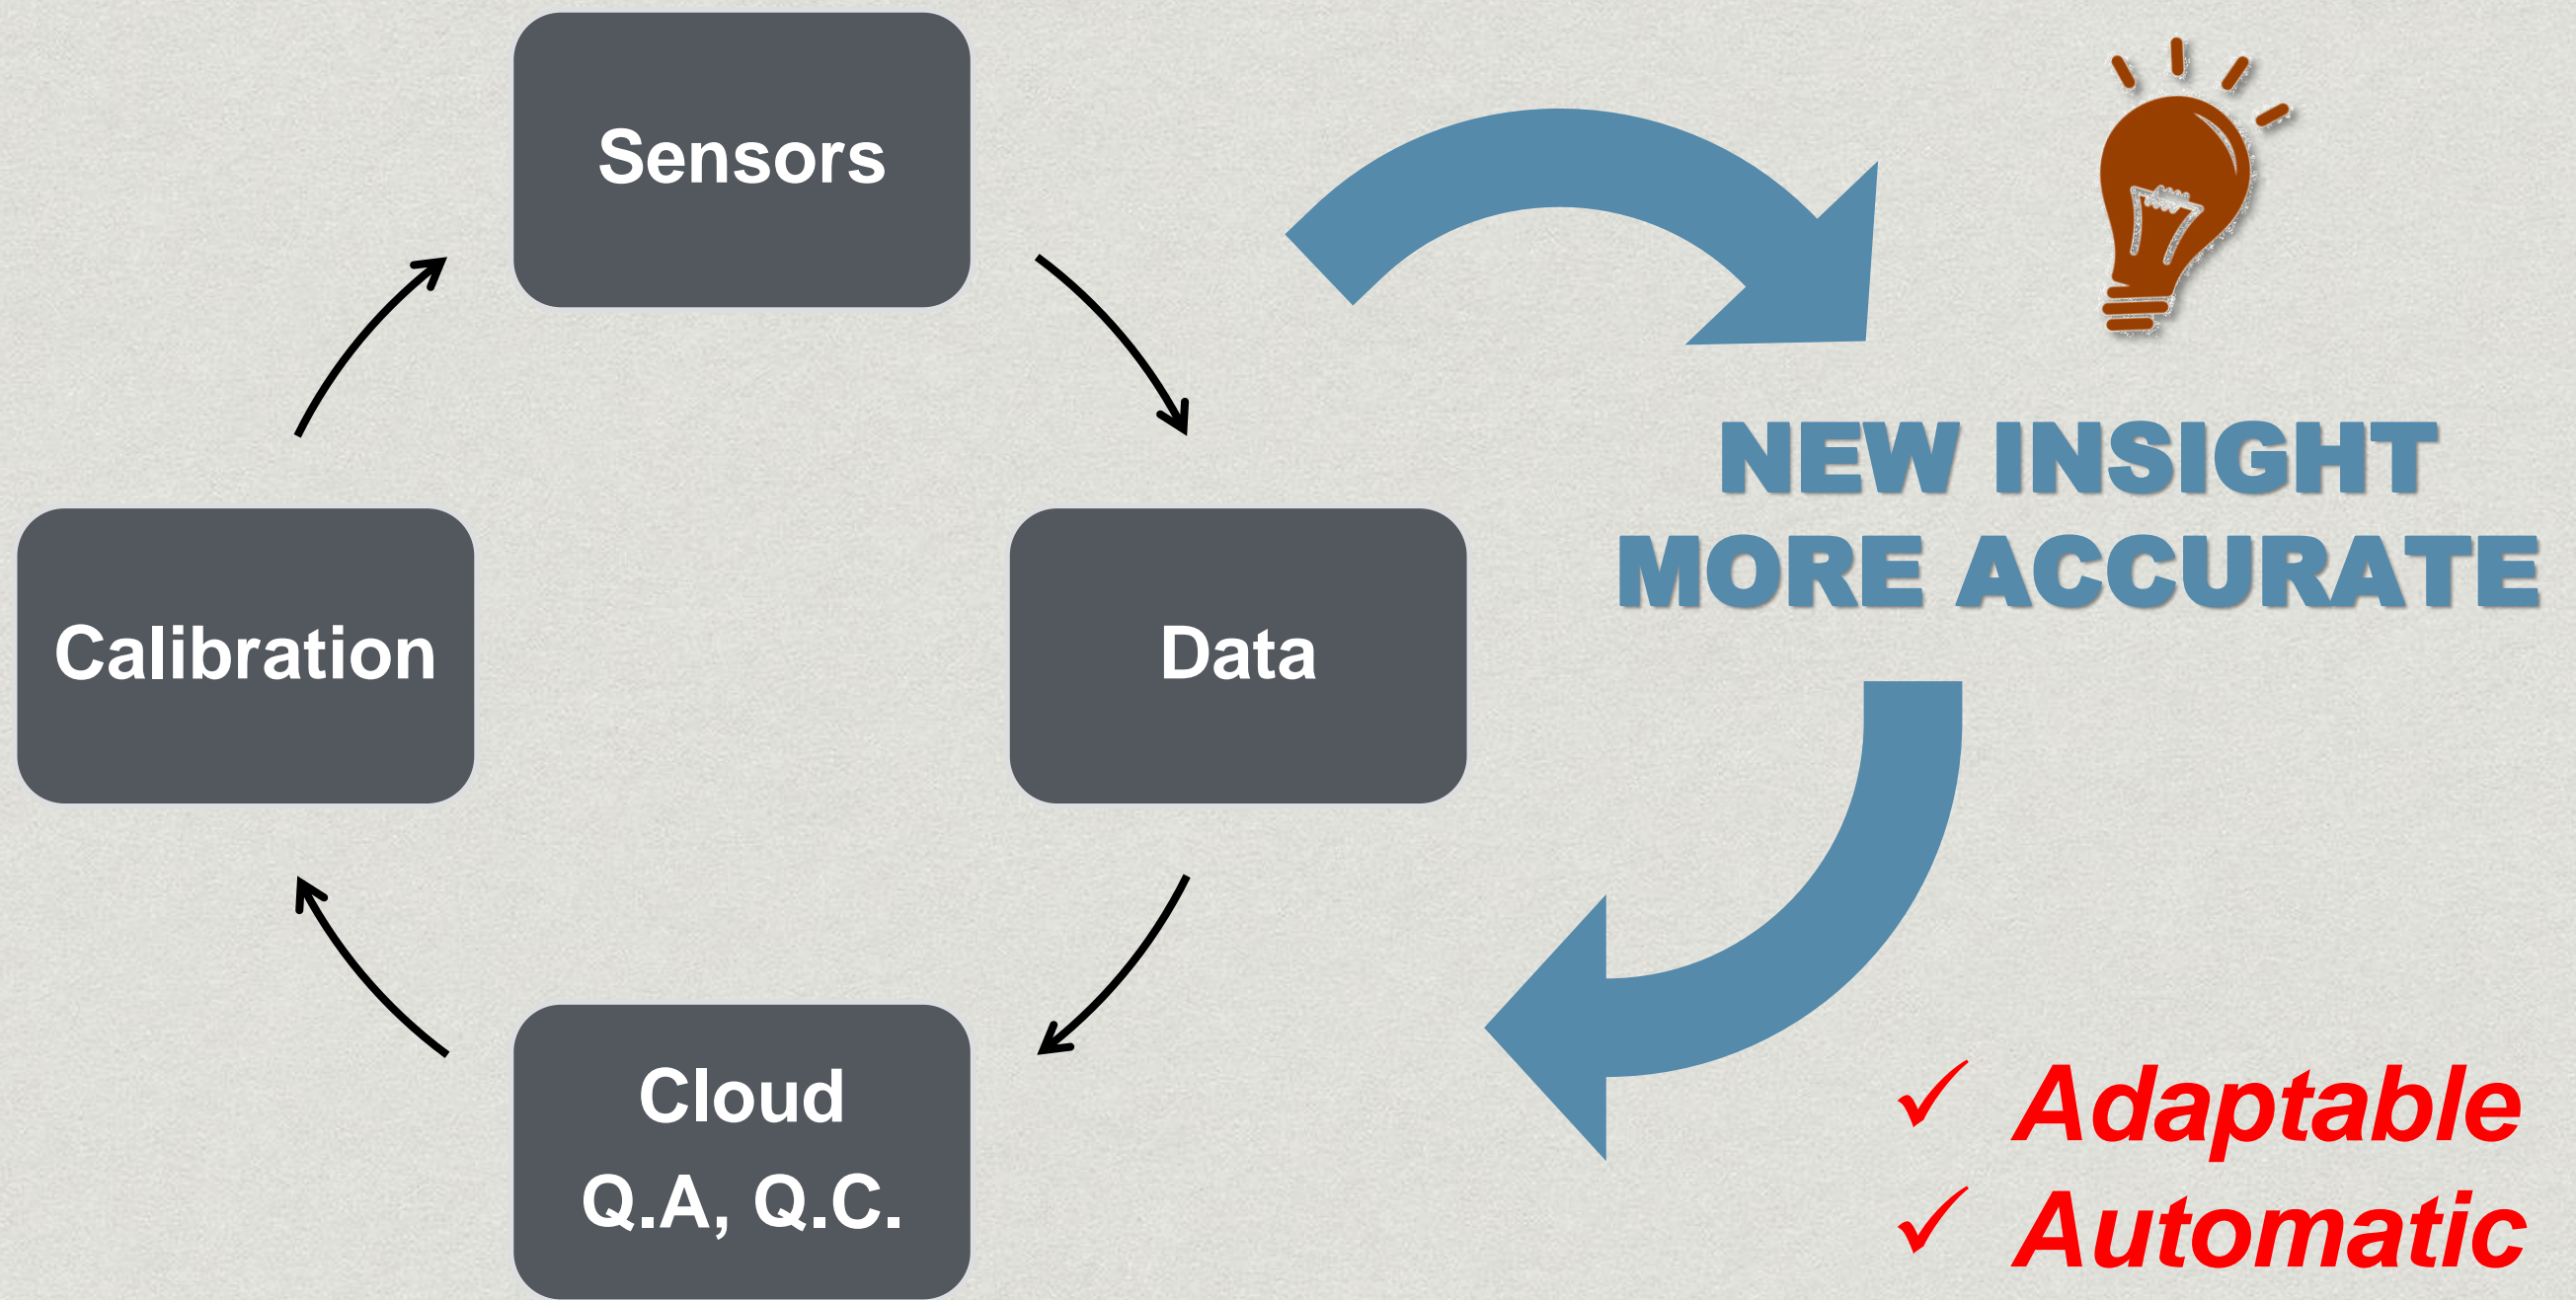

$$\text{RISK} = \text{\textcolor{green}{\$ \$ \$ \$}} \times (\text{Chance of Failure})$$

Crowdsourcing groundwater data is critical!

The cloud allows WellIntel to...

...use **history and neighbors** as guides

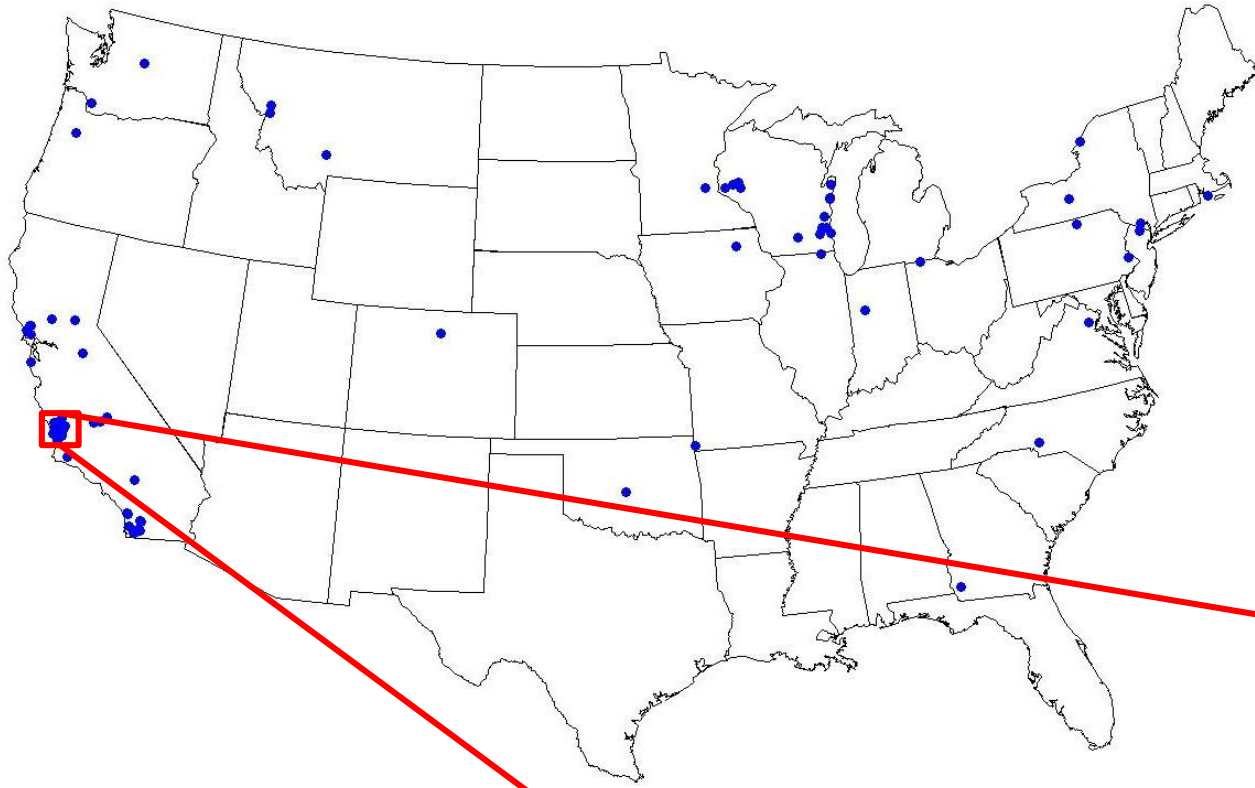

WellIntel is **growing** and customers are **sharing with science!**

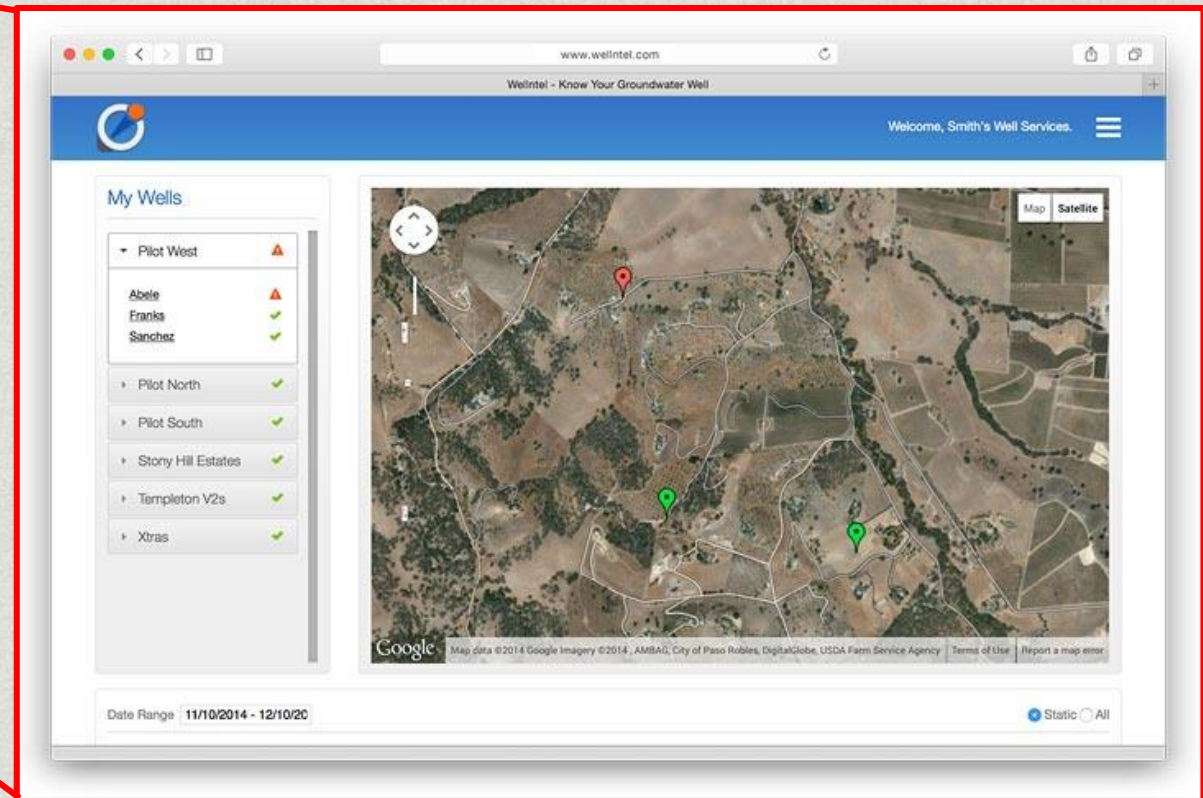

1,500,000
measurements in the
first 6 months

Develop partnerships focused on **regional networks** through **stakeholders** and...

- **Communities**
- **Agencies**
- **Sentinel Sites**
- **Education Centers**
