

# INVESTIGATING STUDENT PERSPECTIVE & EXPERIENCE

with **ONLINE** Geoscience First Year General Education COURSES

Jerusha Lederman

Mary-Helen Armour

York University

Toronto, Canada

GSA Annual Meeting ♦ Seattle ♦ October 22, 2017

## Jerusha Lederman

- H. B.Sc. Space & Communications Science
- M.Sc. Astrophysics
- Ph.D. Atmospheric Physics

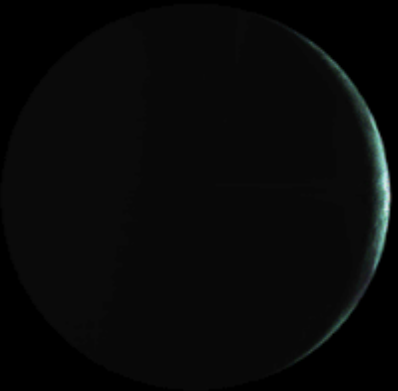

## Mary-Helen Armour

- B.Sc. Physics & Astronomy
- M.Sc. Astronomy
- Ph.D. Geophysics (in Progress)

## York University's DIVISION OF NATURAL SCIENCE, "NATS"

**PHYSICS ♦ CHEMISTRY ♦ BIOLOGY ♦ EARTH & SPACE SCIENCE**

- 
- All non-science undergrads required to take one NATS Gen. Ed. Course
  - Online course offerings increasingly popular

# Online Course Study

## MOTIVATION:

- To have faculty present course content in the best way so as to benefit students in large, introductory online geoscience and general education science courses.

## PRIMARY OBJECTIVE:

- To establish institution-specific best practices guidelines for online instruction.

# Research Methodology

- Gauge student perspective & experience through multiple surveys and focus groups.
- Surveys obtained from NATS students taking 10+ different NATS fully online courses throughout 2017/18 academic year
- 3 surveys across all courses: beginning, middle, end of course
- Surveys track student perception and experience over time.

NATS provides large, diverse student sampling given:

- students are from all disciplines
- students are from all undergrad years
- total student sampling size ~ 1500.

# Student Surveys

21. How much time do you spend or intend to spend at a time working on the course material? (this is learning the material NOT working on assignments) 

- 30 minutes or less
- 30 minutes - 1 hour
- 1 hour - 2 hours
- more than 2 hours

22. How does the professor communicate with the class? (please check all that apply) 

- Emails to entire class (Moodle Announcements)
- Live chats
- Forums/blogs
- Phone
- Face to face meetings

- **Using Survey Monkey**

## Demographic Data in All Surveys

- Age
- Gender
- Domestic / International
- Year of Study
- Time commitments
- Accessibility

# Phases of Project

## Three phases (1 year each):

Phase 1: Examination of presentation of online course content

Phase 2: Examination of student assessment methods in online courses

Phase 3: Examination of resources used for online course instruction

Phase I:

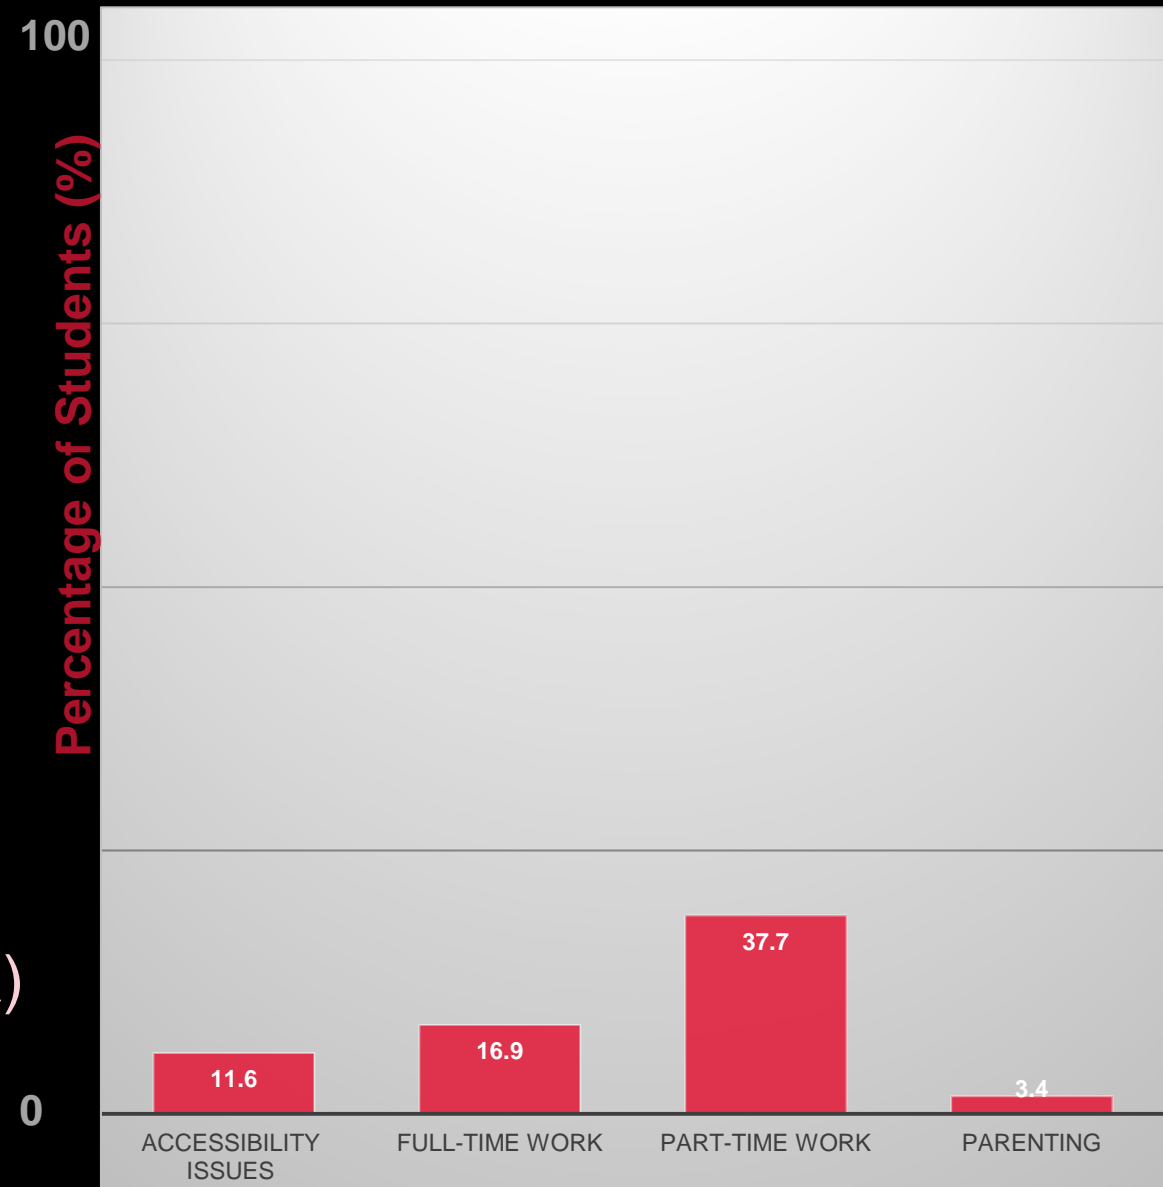

Examination of Content Delivery in Fully Online NATS courses

# York U: Student Profile

Estimated Student Population (2017)  
~ 53,000

Most undergraduate students are:

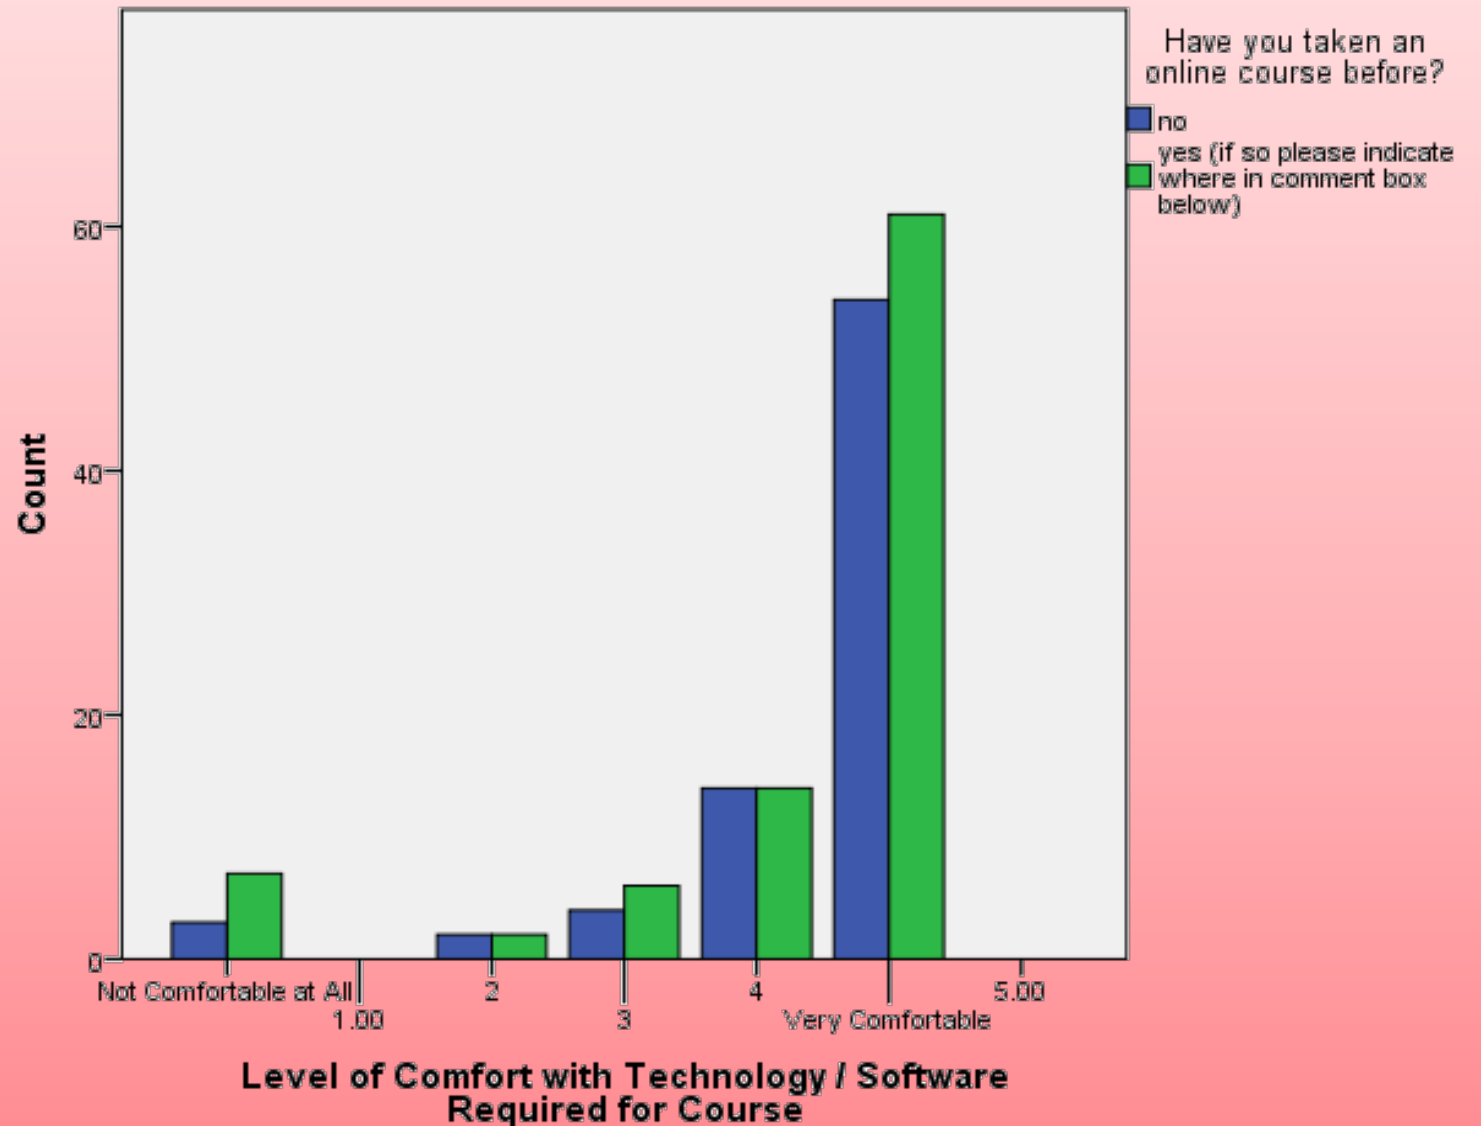

- Direct Entry from High School
- Domestic
- Local (i.e. native to Greater Toronto Area)
- Live at family home
- Commute on average 1 hr / day

# eLearning Trends : Rise of the Fully Online Course

- 54% of students have taken a fully online course before.
- 94% of students consider themselves adequately proficient with tech / software required for course.
- Comfort level not correlated with previous online course experience.

## Why did you take this course online (check all that apply)

Number of Students

## How do you access the internet? (please check all that apply)

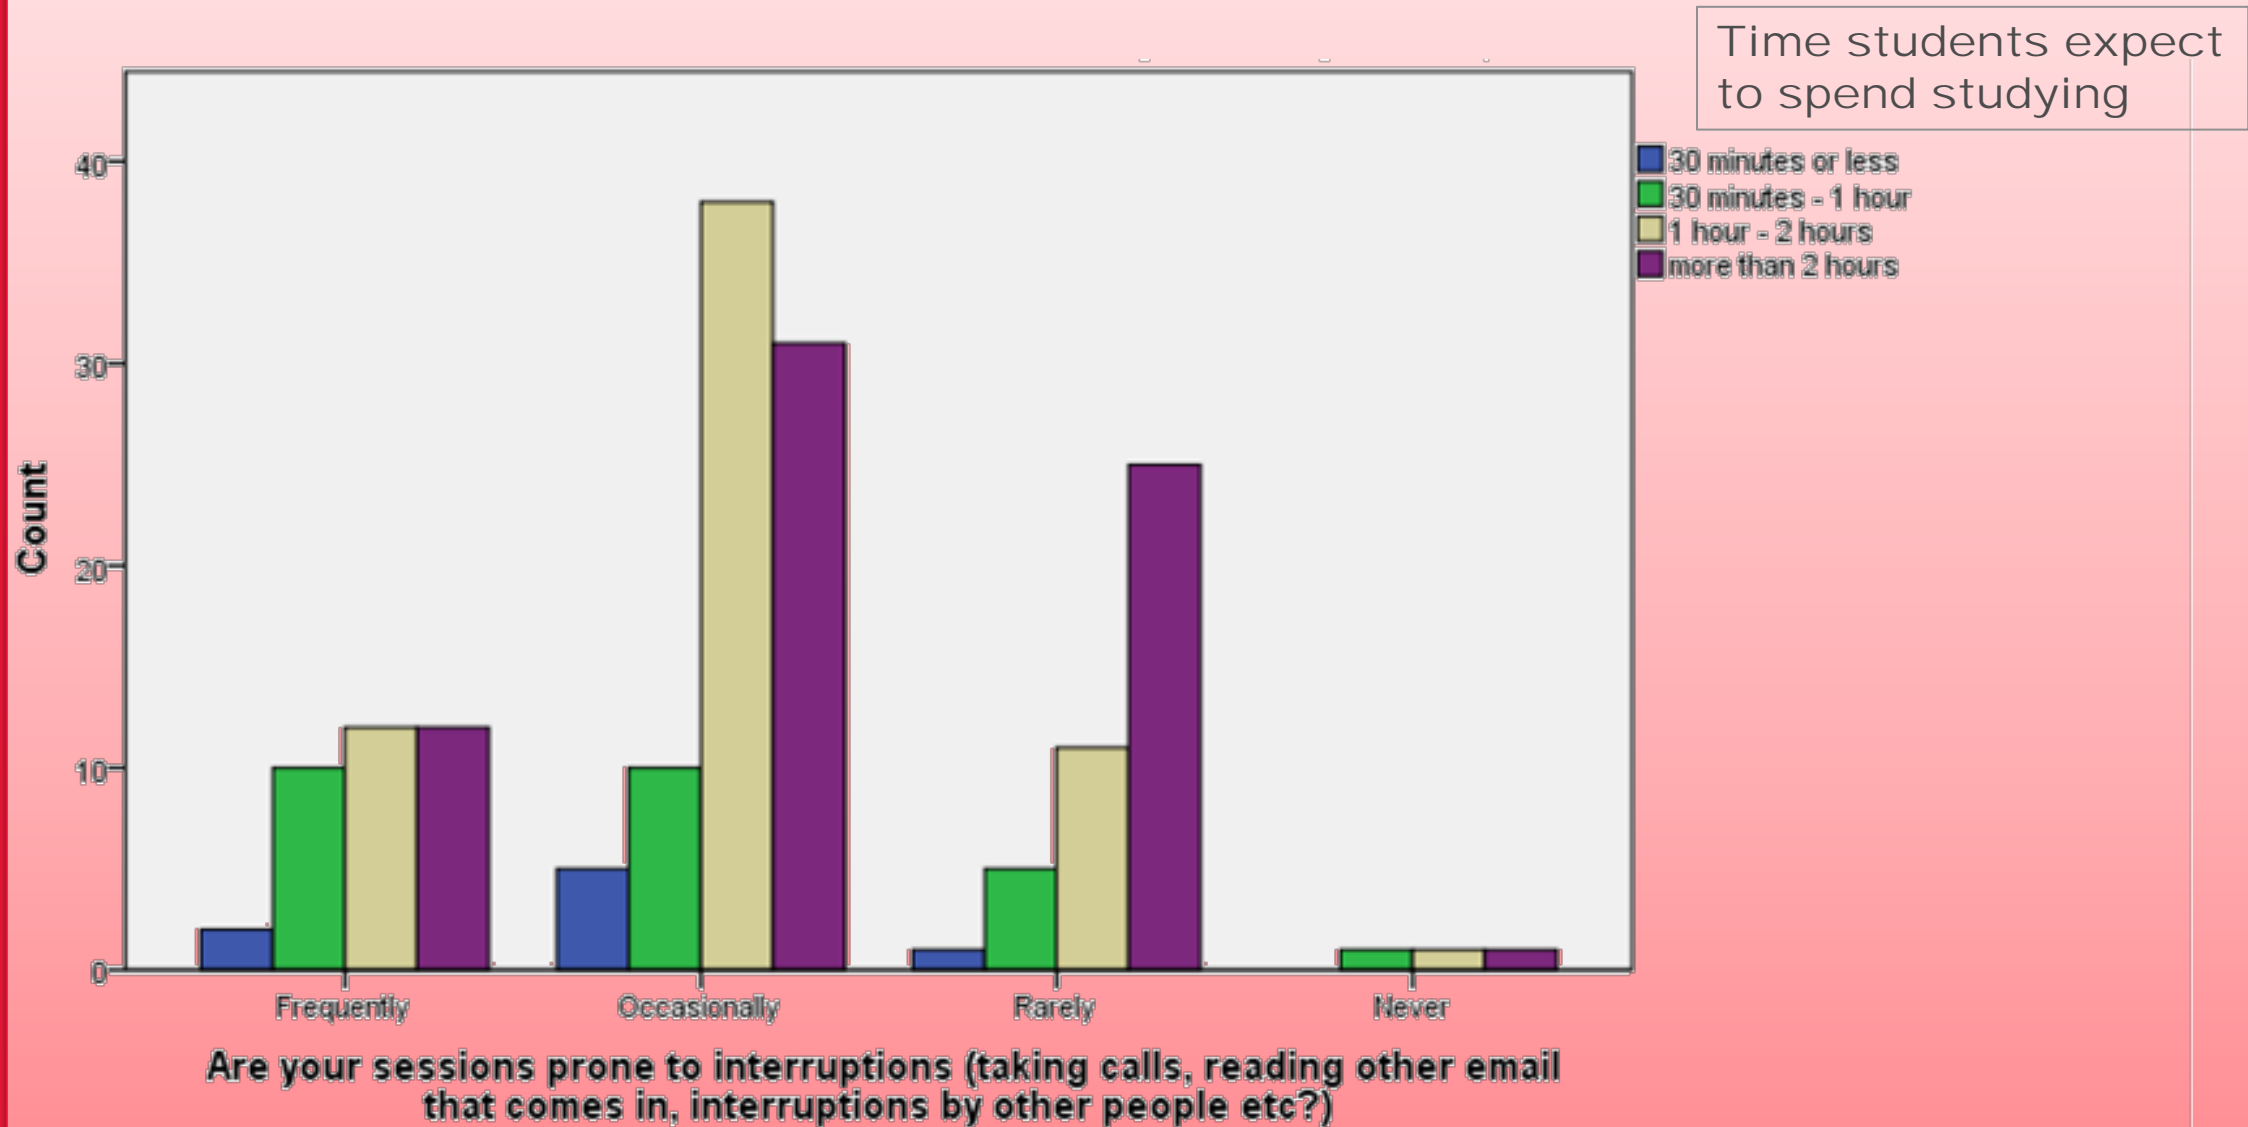

## What device do you use to access the course? (check all that apply)

Number of Students

# Student Study Habits: Perceptions & Expectations for online courses

## How is the content in your course presented? (please check all that apply: 904 replies from 207 cases)

Number of Students

How much time do you spend or intend to spend at a time working on the course material? (this is learning the material NOT working on assignments)

## How is Content Delivered: number of cases. Average Effectiveness.

# Summary and Future Research

- Preliminary results from summer 2017 academic term have been analyzed.
- Surveys for fall / winter 2017/18 have been prepared for distribution
- Focus groups of students, faculty and T.A.s will be held in March 2018.
- Funding initiatives will be undertaken to continue and finalize the project.

## Conclusion: need for Academic Institution Leadership in eLearning

Competition arising from private industry online course offerings in the area of continuing and adult education:

- Udemy
- Coursera
- World Science U
  
- Private industry offers studio level production including VFX, compositing, animation and graphics for recorded lectures.
  
- Offering bodies tend to be corporations whose financial resources may be greater than those of academic institutions.
  
- Advantage of Academia: degree granting privileges for students and research by faculty to develop standardized best practices of delivery for online courses.
  
- Student recruitment and retention in academic institutions may increase if degree granting organizations assume leadership in this area.
